

## **IGLC KEYWORDS** (Version 3)

Christine Pasquire and Iris D. Tommelein

The following keywords provide the selection of words relating to Lean construction as of March 2016. They are arranged under generic words and words particularly (but not exclusively) associated with each of the research themes.

Authors of papers for the 2016 conference (IGLC24) are requested to select at least three keywords from this list and can add their own keywords to a maximum of five in total.

### ***Generic Keywords:***

benefits realization	flow	sustainability
big room/obeya	integration	transformation
collaboration/collaborative	kanban	value
complex/complexity	process	value stream
concurrent	production	variability
continuous improvement/kaizen	pull	visual management
last planner system	re-entrant flow	waste
lean construction	standardization	work flow

### ***Themed Keywords:***

#### ***contract, cost management***

alliancing  
cost led procurement  
integrated form of agreement  
(IFOA)  
integrated project delivery (IPD)  
open book  
relational  
target cost  
transactional

#### ***people, culture, change***

action learning  
collaboration  
commitment  
language/linguistic action  
perspective  
promise  
trust

#### ***prefabrication, assembly,***

#### ***open building***

customization  
flexible  
manufacturing  
tolerance

#### ***product development, design management***

Choosing by Advantages  
(CBA)  
set based design (SBD)  
Target Value Design (TVD)

#### ***production planning, control***

buffer  
constraint analysis  
lookahead  
make ready  
time compression

#### ***production system design***

inventory control  
job-sequencing  
location-based  
management (LBM)  
logistics  
takt time planning (TTP)  
work structuring  
work in progress/process

#### ***safety, quality, environment***

#### ***supply chain management (SCM)***

#### ***theory***
